

Freedom

A word describing
a state of human being
a state of human feeling
a quality of intangible
nature you
feel it you miss it
when it's gone

A poet one time
called it love, freedom
is likened to it, it is
a feeling as strong

One can applaud
and laud it to the end of the
earth, when you feel it
your spirit soars, you
know when you're free

II

And free is many
words, many conditions
non-negotiable with
governing power,
you feel freedom in her
smile or touch and
hold it as long as
you can, you feel
it on a spring blown
hill and your feet
